

NorthWest Crossing Commercial & Industrial Signage Guidelines for Prototypes:
T1, T2, T3, V1 & V6
Addendum #1
October 2009

The following revisions, deletions and additions are hereby incorporated into the NorthWest Crossing Commercial & Industrial Signage Guidelines as follows:

1. General Signage Information – for all Prototypes noted above:

Sandwich Boards: Given the current challenging economic time the NorthWest Crossing Architectural Review Committee will consider offsite sandwich boards (not located on public rights of way) on an exception basis for a limited duration. Sandwich board designs must be submitted to the NorthWest Crossing ARC for review and approval. Sandwich boards must be professionally produced, may be out from 7 am to 7 pm, must be managed by the owner and must be removed at the request of the NorthWest Crossing ARC. Approval period may be up to three months, but will not exceed a year.
